EXPANDED EXECUTIVE NARRATIVE

Netsirv SOP & Document Management Ecosystem

A client decision deck for turning procedures, documents, training, mobile capture, AI and accounting into one connected operating layer.

SOP-FIRST · AI-ASSISTED · AUDIT-READY · ACCOUNTING-AWARE

The front door is document management.
The strategic outcome is operational control.

1

The narrative shift

NETSIRV

From passive document storage to an active operating system for work.

OLD MODEL
Document repository

Files are uploaded, named, searched and sometimes forgotten. The system can store the SOP, but it cannot prove that the right SOP governed the work.

Common outcome: documents exist, but operations still rely on memory, email, manual entry and tribal knowledge.

NETSIRV MODEL
Operational intelligence layer

The SOP is connected to training, mobile workflow, evidence, approvals, transactions and financial output. The document is no longer passive, it drives the process.

Better outcome: the organization can trace during happened, why it happened, who was qualified, and what evidence supports it.

1 / CLIENT STORY

2

Why this matters now

NETSIRV

Document chaos is not an IT inconvenience - it becomes an operations, compliance and finance problem.

1. **SOP drift** — Employees may use outdated versions or informal workarounds.
2. **Evidence gaps** — Invoices, receipts, photos and BOLs are separated from the work they support.
3. **Manual re-keying** — Financial and operational data is typed again after it already appeared on a document.
4. **Audit fragility** — Hard to prove procedure, training, task execution and source evidence in one chain.

The cost is not only lost time. It is weak control over how work is performed, documented, approved and reported.

1 / CLIENT STORY

3

Why traditional document management falls short

NETSIRV

It stores content, but it rarely controls the work that content is supposed to govern.

Netsirv Context Graph
SOP: Cross-Dock Receiving

Active SOP	v2.1
Trained Users	42
BOL Evidence	18
Open Exceptions	3
GL Impact	$12.4k

The difference is relationship intelligence: documents are linked to SOPs, users, training, transactions and audit evidence.

1 / CLIENT STORY

4

The Netsirv ecosystem model

NETSIRV

A reusable platform pattern: SOPs guide work, documents prove work, data drives outcomes.

Each capability can be sold independently, but they compound when connected.

2 / ECOSYSTEM

6

Universal document intelligence

NETSIRV

One intake pipeline handles SOPs, invoices, contracts, BOLs, receipts, photos and handwritten documents.

1. **AI assists** — It classifies document type and extracts structured data.
2. **People control** — Uncertain fields go to review instead of passing silently.
3. **Evidence remains** — Original file, extraction, corrections and relationships are retained.

7

Mobile turns field work into governed records

NETSIRV

The employee experience stays simple: open task, see SOP, scan evidence, verify and submit.

SOP, invoice, item, user, device and GL classification are linked.

3 / USER EXPERIENCE

8

SOP + Academy creates a governance differentiator

NETSIRV

Access can be based on demonstrated competency, not just a permissions checkbox.

3 / USER EXPERIENCE

9

Documents become relationship-aware business objects

NETSIRV

A document is valuable because of what it connects to.

This is the difference between storing a file and creating an operational knowledge graph.

4 / DOCUMENT INTELLIGENCE

10

Audit & evidence chain

NETSIRV

Every meaningful event can be reconstructed from governing SOP through financial output.

4 / DOCUMENT INTELLIGENCE

12

Accounting is not an afterthought

NETSIRV

Operational events flow to accounting with full context, not as orphan entries.

Operational Event	Accounting Impact	
Service invoice approved	GL Account	6330
ABC HVAC	Service Expense	
$725	Amount	$725
	Location	Main Office
	Asset	RTU-006
	Vendor	ABC HVAC

- ✓ SOP followed
- ✓ User trained
- ✓ Evidence captured
- ✓ Approval obtained

Clean data in. Clean books out. Audit confidence all the way through.

13

Exception management keeps work moving

NETSIRV

Exceptions are captured, routed, resolved and retained.

Exceptions are visible, not hidden.

5 / FINANCIAL INTEGRITY

14

Dashboards that drive behavior

NETSIRV

Real-time visibility across operations, compliance and finance.

Metrics drive improvements when the data is connected and trusted.

5 / FINANCIAL INTEGRITY

15

Platform architecture at a glance

NETSIRV

Secure, scalable and built for integration.

Built for government, enterprise and highly regulated industries.

6 / PLATFORM

17

Integration without disruption

NETSIRV

Connects with the systems you have today.

Open standards. Secure connections. Real operational value.

6 / PLATFORM

18

Implementation roadmap

NETSIRV

A phased approach that delivers value early and scales confidently.

Each phase is useful on day one and builds toward a fully connected operational platform.

7 / ROADMAP

19

Pilot program blueprint

NETSIRV

Small scope. Clear outcomes. Low risk.

Scope	One process, one location
Duration	8 – 12 weeks
Participants	10 – 12 users
Participants	10 – 30 users
Deliverables	Working workflow, data integrity, reports
Success Criteria	Adoption, accuracy, time savings, SLA, ROI

Pilot Outcomes

- ✓ Validated process
- ✓ Trained users
- ✓ Connected data
- ✓ Measurable results
- ✓ Plan to scale

7 / ROADMAP

20

Expected outcomes

NETSIRV

Measurable improvements across the organization.

30 – 50%	20 – 40%	25 – 60%	100%	Stronger
Reduction in manual data entry	Faster invoice processing	Fewer exceptions & rework	Audit-ready evidence chain	Compliance & governance

Better data. Better decisions. Better outcomes.

7 / ROADMAP

21

Who benefits

NETSIRV

Every role wins when the system is connected.

Employees	Managers	Finance	IT	Executives
• Clear SOPs	• Real-time visibility	• Clean data	• Secure platform	• Operational control
• Easy mobile tools	• Better control	• Faster close	• Easy integrations	• Risk reduction
• Less rework	• Fewer surprises	• Strong audit trail	• Lower complexity	• Better outcomes

One platform. Many benefits. Organization-wide impact.

7 / ROADMAP

22

Let's build what's next

NETSIRV

Turn your SOPs, documents and data into operational excellence.

- Start with a conversation
- Define your pilot
- Deliver quick wins
- Scale with confidence

Letivi + invoi
AI INFUSED SOP

Work governed. Evidence connected. Outcomes delivered.
